Art Unit: 2611

- 1. The Amendment filed on 03/09/2007 has been entered. Claims 2-6, 8-10, 12-16 and 18-20 are pending in this Office action.
- 2. Claims 2-3, 8-10, 4-6, 12-13, 18-20 and 14-16 have been renumbered as claims 1-16 respectively.

## Response to Arguments

- 3. Applicant's arguments, see Applicants' Remarks, filed on 03/09/2007, with respect to claims 1, 7, 11 and 17 have been fully considered and are persuasive. The rejection of claims 1, 7, 11 and 17 has been withdrawn.
- 4. Objection to the Drawings has been withdrawn after Applicants correct all the informalities.

## Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

5. Regarding claim 2, claim is allowable over prior art record because the cited references taken individually or in combination cannot teach or suggest the allowable limitations "wherein the step (a) comprises the step (c) of performing the predetermined processing on the transmission data on the frequency axis such that the inverted signal

Art Unit: 2611

and at least one zero signal point are inserted between the transmission signals on the

time axis".

6. Regarding claim 3, claim is allowable over prior art record because the cited

references taken individually or in combination cannot teach or suggest the allowable

limitations "wherein the step (a) comprises the step (d) of copying the transmission data

on the frequency axis, and the step (b) comprises the step (e) of processing the

transmission data and the copied transmission data in parallel".

7. Regarding claim 4, claim is allowable over prior art record because the cited

references taken individually or in combination cannot teach or suggest the allowable

limitations "wherein the step (a) comprises the step (f) of performing the predetermined

processing on the transmission data such that the transmission signal of the

transmission data is delayed by a predetermined time, and the delayed transmission

signal is subtracted from the transmission signal".

8. Regarding claim 12, claim is allowable over prior art record because the cited

references taken individually or in combination cannot teach or suggest the allowable

limitations "wherein the frequency-axis processing means perform the predetermined

processing on the transmission data on the frequency axis such that the inverted signal

and at least one zero signal point are inserted between the transmission signals of the

transmission data on the time axis".

Art Unit: 2611

9. Regarding claim 13, claim is allowable over prior art record because the cited

references taken individually or in combination cannot teach or suggest the allowable

limitations "wherein the frequency-axis processing means comprise copying means for

copying the transmission data on the frequency axis, and the time-axis transform means

process the transmission data and the copied transmission data in parallel".

10. Regarding claim 14, claim is allowable over prior art record because the cited

references taken individually or in combination cannot teach or suggest the allowable

limitations "wherein the frequency-axis processing means comprise delay finite-

difference means for delaying the transmission signal, and subtracting the delayed

transmission signal from the transmission signal".

Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."

Conclusion

11. Any inquiry concerning this communication or earlier communications from

the examiner should be directed to Khanh Tran whose telephone number is 571-272-

Art Unit: 2611

3007. The examiner can normally be reached on Monday - Friday from 08:00 AM -

05:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
